PLAN FOR THE SIX VOLUMES

Volume I:	Indexes to Volumes III and V.
Volume II:	The work of John Cooke. Photostatic reproduction of *The Preacher's Assistant* (1783) Volume II.
Volume III:	Sermons listed numerically by Bible Books.
Volume IV:	Alphabetical listing by authors of sermons.
Volume V:	Year of publication of sermons, with provenance.
Volume VI:	Listing of individual sermons chronologically.

TABLE OF CONTENTS

Volume VI

Symbols Used for Comparing Source Records vii

John Cooke's List of Abbreviations xv

Chronological Listing of Individual Sermons 1

Code Numbers of the Biblical Books 451

ARBITRARY SYMBOLS USED IN VOLUMES III AND/OR IV AND VI

SYMBOLS THAT OCCUR IN, OR THAT REPRESENT SYMBOLS THAT OCCUR IN, THE FIRST VOLUME OF COOKE'S OWN WORK

*Author's Name: A single asterisk before an author's name is Cooke's symbol that the record in which it occurs did not appear within the set of records that was compiled and published thirty years earlier, in 1753, by Sampson Letsome, who gave his antecedent work the same title as John Cooke adopted in 1783 for his later work: The Preacher's Assistant.

Author's Name: Underscoring of an author's name represents the italic lettering which Cooke used to indicate that the author was a Nonconformist: i.e., a Dissenter from the Church of England.

<Author's Name>: Pointed brackets around an author's name represent square brackets which Cooke used in the same positions to indicate that he might be wrong about authorship.

Abbreviations: All abbreviations are copied from the source records. Cooke's "List of Abbreviations" is reproduced in the present volume on the pages indicated by the "Table of Contents". Aids to interpretation of Cooke's abbreviations will be found after the list.

SYMBOLS THAT DO NOT REPLICATE OR REPRESENT ANY OF COOKE'S ARBITRARY SYMBOLS

** Footnote Double asterisks occur before some footnotes. They indicate that the footnote is the present editor's. All footnotes that do not begin with double asterisks are Cooke's own.

Coded Text: The eight digits enclosed within pointed brackets in the column headed Coded Text within Volume III of the present edition designate the biblical text of the sermon, as follows: The first two digits designate a book within the Bible; the succeeding three digits, a chapter within that biblical book; and the final three digits, the verse at which the text begins within that chapter. An example follows:

<06005010> This code specifies (by its first two digits, 06) the sixth book of the Bible (which for Cooke's listings of sermons includes some of the Apocrypha), the fifth chapter of that book (by the succeeding three digits, 005), and the tenth verse of that chapter (by the final three digits, 010). Thus it designates any biblical text that begins with the verse 10 in Chapter V of the book of Joshua within the Bible.

The Index Volume of the present edition uses these code numbers to specify the biblical texts of the sermons to which the index refers. The last six digits within ■ coded text are easily interpreted by a reader: three for chapter, three for beginning verse. The first two digits, not so immmediately interpretable, are listed, each with the name of the biblical book to which it refers, within the front cover of each volume of the present edition.

SYMBOLS USED IN THE COLUMN "Sources Compared" WITHIN THIS VOLUME

Superscript numbers on this page and the next refer to Notes. These begin at the bottom of the next page, immediately below the list entitled Source Symbols.

The Notes define what is meant by the statement that two sources of a record agree or disagree about author's Name, biblical Text, printing Format, or publication Date. Note 13 states Causes of disagreement.

The Notes also explain how the symbols of comparison may assist readers in cross reference[1] from this volume to Volumes II and V in the present edition of Cooke's work. Volumes II and V are useful for readers who wish to proceed from listings in this work to cognate listings in library and other catalogues.

Wherever Sources Compared shows two sources of information concerning a sermon, information from both sources will be found within a composite record in Volume V, sometimes with an accompanying footnote by the present editor. Within the composite record readers will often find that Cooke's abbreviations which appear under Occasion or Subject in the present volume are expanded and clarified.

Following the Notes is a two-page description of the evolution of Volumes III, IV, V, and VI of this edition from comparison of source records. Users will understand the symbols better if they read it first.

Symbols of Comparison

Sources Compared	Explanation
<1C ---- 2c >	In their separate records of what the present editor has judged[2] to be the same sermon,[3] Cooke's Vol.I <1C> and his Vol.II <2C> agree[4] on four points: (1) its biblical text, (2) its author's name and conformity or nonconformity to Church of England, (3) format and (4) date of printing.
<1C T--- 2C >	The source records 1C and 2C disagree about biblical Text[5] of sermon; agree on other three points.
<1C -N-- 2C >	The source records 1C and 2C may not fully agree about Name[6] of author, or they disagree about the author's conformity or nonconformity to the Church of England. (Underscoring or italicization of author's name indicates author's nonconformity.) They do agree on the other three points.
<1C --F- 2C >	The source records 1C and 2C do not give same Format[7] of printing; agree on other three points.
<1C ---D 2C >	The source records 1C and 2C do not give same Date[8] of ■ printing; agree on other three points.
<1C ---I 2C >	The source records 1C and 2C do not give same date of printing, and the 1C record indicates, by giving a page and/or volume number, that the sermon was printed as an Item[9] in ■ collective edition.
<1C >	Cooke I records the sermon as published in a collective edition.[11] Cooke II does not itemize the contents of this collective edition.
<1C NULL>	Cooke I records the sermon as published in a single-sermon edition or other edition the contents of which Cooke II would normally itemize, but Cooke II does not itemize the sermon.
<NULL 2C >	Cooke II itemizes the sermon, but Cooke I does not list it.
<NAME N 2C >	Cooke II records the sermon as anonymous, but gives author's name or initials parenthetically. Cooke I lists the sermon only with author's name or initials, not as anonymous.
<NAME ? 2C >	Cooke II records the sermon as anonymous, without parenthetic inclusion of an author's name. In Vol. V the present editor points out similarity between the record for Anonymous and some record for a named author.

Source Symbols

Primary sources of the present volume

Symbol	Significance
<1C	Record in Cooke's Vol.I as published in 1783
<1CAP	Record in Cooke's APPENDIX to his Vol.I
<1CAD	1C, with data added from Cooke's list of ADDENDA
<1CER	1C, corrected in accordance with Cooke's ERRATA
<1CST	1C, with obvious misprint[1,2] re biblical Text corrected by present editor, Spaulding
<1CSY	1C, with obvious misprint[1,2] re Year corrected by S.
<1CSC	1C, with one or more Characters corrected by S.
<1CCC	1C, corrected in present edition to agree with Correlative records elsewhere in 1783 edition.
<1CIC	1C, faultily transcribed for present edition; resultant record later corrected to agree with 1C

Secondary sources of the present volume

Symbol	Significance
2C >	Record in Cooke's Volume II
2CAP>	Record in Cooke's APPENDIX to his Volume II
2CAD>	2C, with data added from Cooke's ADDENDA to II
2CER>	2C, corrected in accordance with Cooke's ERRATA
2CST>	2C, with obvious misprint[1,2] re biblical Text corrected by present editor, Spaulding
2CSY>	2C, with obvious misprint[1,2] re Year corrected by S.
2CSR	2C, with its information about biblical text Rewritten (but not altered in substance) by S. to permit data processing by computer.
2CSW	2C, with its items of information rearranged or otherwise reWritten by S. to facilitate computer-processing of its data regarding (1) alternative editions, or (2) a collective edition published in volumes of different dates, or (3) sermons itemized as contents of an edition that is identified in 2C.

<1LS A record in Letsome's Part One: i.e.,Part One of the edition of The Preacher's Assistant that was printed in 1753 for its editor, Sampson Letsome, Cooke's predecessor by thirty years.

(In initial preparation of copy for the present edition of Cooke's work, Letsome's Part One was used to fill, so far as it would serve to do so, a gap in Cooke's records of sermons on Ecclesiastes vii, verses 2 to 14, that were published in collective editions. [See page 125 in our Volume III.] Records of sermons published in single-sermon editions on these texts are supplied by Cooke's second volume. A similar gap in regard to sermons on texts in II Kings between chapter iv verse 1, author TRIMNEL, and chapter v verse 18 is filled from the same source by a list in the Appendix to our Volume III. Evidently Cooke or his printer lost two separate manuscript pages of Cooke's copy for his first volume. Each manuscript page probably held twenty-five records or a few more.)

Notes

1. Cross-reference to Vols. II and V. To identify a publication specified by date and format in the column headed Edition within the present volume, consult Volume II. This replicates a copy of Volume II of Cooke's work in its original 1783 edition. In it authors are listed with their titles, degrees, and clerical appointments so far as Cooke was able to learn these matters. Below each author's name therein, relevant publications that are specified in the present volume by date and format are listed in chronological order, often with further information about them. The arrangement of authors' names in Volume II is alphabetical in the eighteenth-century fashion: J's and I's are intermingled, and so are U's and V's. In Volume V of the present edition all publications that are listed in Volume II are relisted in chronological order, with editorial apparatus appended to each listing. For more information about cross-reference to Volume V, see Note 10.

Notes (continued)

2. Editor's judgment: The present editor's judgment about whether or not two source records concern the same sermon is based upon his estimate of the probabilities, and this estimate is based on his experience with Cooke's data. Some of his judgments may be wrong. The present edition lays his evidence open to examination by the reader.

3. Same sermon: The term "same sermon" is used loosely. A printed sermon may differ substantially from the "same" sermon as spoken. One copy of a sermon may differ in significant detail (because of damage to a title-page, a type-face, a signature, or an assembly of signatures in binding) from another copy of the same edition or issue. One edition of a sermon may differ from another in substance.

4. - = agree. A hyphen "-" indicates agreement between primary and secondary sources as follows:

   - biblical text of a sermon if one source shows the biblical passage chosen for text as beginning with the same verse of the same chapter of the same biblical book as the other does;

   - name of author if source data concerning name fulfill three conditions simultaneously:
   (a) identical indications of conformity or nonconformity to Church of England [italic or underscored letters in name indicate nonconformity],
   (b) identical spelling of surname,
   (c) identical spelling of first name[s] or standard abbreviation or initial in one record of first name more fully represented in the other,

   (N.B. If author's first name[s] or initial[s] is preceded by "Bp." or "Abp." in one record and not in the other, the records are not judged to be in agreement in regard to author's name because agreement about first name has not been checked by computer. Hence in such cases "N" appears in the place of "-" in respect to name under Sources Compared even though disagreement has not been found and is highly unlikely),

   - format of printing if both source records indicate same format;

   - date of edition if both source records indicate same year.

5. T = disagreement about biblical Text. In our Vol. V the differing textual citations are both shown within one record. If the difference is greater than a single verse in regard to where the text begins, the sermon is listed for both texts in our Vol. III Sermons Listed by Biblical Text. The secondary listing there bears the parenthesis "<See Fifth Vol. of Present Biblio.>".

6. N = disagreement about author's Name or about his conformity or nonconformity to Church of England. In our Vol. V the discrepant information that the two sources offer regarding these matters is presented within a single record. If the discrepancy is substantial, the sermon is listed for both names (or spellings of the same name) in our Vol. IV Sermons Listed by Authors' Names. (The secondary listing there contains the parenthesis "<See Fifth Vol. of Present Biblio.>".)

   All disagreements, or uncertainties about agreement, that produce the letter "N" in place of a hyphen "-" under Sources Compared are treated as substantial and hence result in secondary records as well as primary within Vol. IV except as follows:

   (a) Church of England: Disagreement in regard to whether an author is a Nonconformist, as indicated by underscoring (italicization) of his name, is not treated as substantial.

   (b) Surname: Disagreement about whether or not the final letter of an author's surname should be doubled (e.g., Burnett vs. Burnet) is not treated as substantial.

Notes (continued)

(c) Given name: Uncertain agreement about given name of Bp. or Abp. (as described in the parenthetic N.B. that closes discussion of name of author in note 3, above) is not disagreement of any kind, substantial or otherwise. It is merely uncertainty.

7. F = disagreement about Format of printing. In our Vol. V the differing statements of format are shown within a single record.

8. D = disagreement about date of publication. In our Vol. V the differing dates are shown within a single record. To find it, use either of the two methods of cross-reference -- Direc. or Indirect -- that are described in Note 10.

9. I = disagreement about date of publication of a sermon that was printed as an Item within a collective edition. To find a composite record that shows the differing dates, use the method of Indirect cross-reference that is described in the first paragraph within Note 10, below.

10. To find a composite record in Vol. V: If Sources Compared shows the two sources of information in agreement about date, the composite record will be found in Vol. V under the same date as is shown in the present volume, which gives the 1C date. But if disagreement about date is indicated, the composite record will be found in Vol. V under the 2C date. To learn that date, a reader should turn to Vol. II, where the relevant 2C record may be recognized under author's name by the biblical text cited within it. After noting the date given within this record, he may proceed to Vol. V. This is the method of Indirect cross-reference from the present volume through Vol. II to Vol. V.

If "I" is the symbol of disagreement, the reader should adopt the method of Indirect cross-reference. ("I" records are infrequent in the present volume: there are only 151 of them.)

If "D" is the symbol of disagreement about Date, a reader may, if he wishes, choose another method: Direct cross-reference from the present volume to Volume V. This method is somewhat hazardous. In about half the cases where the symbol is "D", a reader will find under the 1C date in Vol. V an entry directing him to the composite entry under the 2C date in the same volume. In the remaining cases he will find no such directive entry there under the 1C date, but will find the composite record itself under a date exactly one year earlier or one year later than the 1C date. Thus if a reader chooses the method of Direct cross-reference, he may need to look for a relevant entry not only within the set of records listed in Vol. V as publications of the year specified within the present volume but also within one or even two sets of records for immediately adjacent years.

11. <1C > Cooke I records the sermon as published in a collective edition of date and format as shown in the record. Presumably, a publication of the same date and format may be found listed under author's name in Cooke II with further information about it, such as abbreviated or full title and the names of those libraries, if within the universities at Oxford and Cambridge, or in the College at Eton, or among a certain three in London, that in Cooke's day contained a copy. The information in Cooke II, however, seldom includes an itemization of sermons contained in a collective edition. Since in Volume I Cooke lists most sermons as published in collective editions, the set of symbols <1C > occurs in more than half the records within the present volume. Correpondence between records in Volume I concerning sermons printed in collective editions and records in Volume II concerning the editions which contain them sometimes fails. It has not been possible for the present editor to search out these failures of correspondence between records in Cooke II and Cooke I regarding collective editions and the sermons printed within them.

Notes (continued)

12. Misprints and non-standard spellings: As users of these volumes will know, spelling was often erratic in eighteenth century documents. In principle, all erratic spellings and also all obvious misprints within Cooke's records have been preserved during transcription of them into machine-readable form in preparation of the present edition of his work except where alteration seemed required by common sense in editing or was needed for proper sorting, comparing, and other processing of the transcribed records by computer. To ensure accuracy in transcription, two distinct transcriptions were made by two different key-punch operators reading independently from two different enlarged Xerox copies of two different printed copies (one in the British Museum, the other in the Yale University Library) of the original edition. The two transcriptions were then compared by computer, differences discovered, and operators' errors corrected.

    In regard to obvious misprints in Cooke's work, it should be remarked that, as the imprint upon title pages in the 1783 edition shows, Cooke's work was privately printed for him as editor. Probably he lacked financial resources for extensive resetting of type. He had received a stipend of only four pounds annually during the years 1765-1780 that he was a Chaplain at Christ Church in Oxford, where he had entered his College as a Sizar (a servitor). Appointment to a "good living" -- that of Rector of Wentnor, in Shropshire -- must have improved his financial situtation after 1780, but perhaps hurried him to get his work into print. There are signs of haste in his Volume II. It appears to have been set into type by at least two, more probably three, and perhaps four different compositors working under different conditions, but probably not always at different times. These facts are indicated by diversities between sets of gatherings of sheets in respect to such things as pagination, catchword usage, and frequency of certain types of phonetic confusion in regard to numerals. But Cooke's own work is not careless.

13. Causes of disagreement: By no means all disagreements between the primary and the secondary sources of this volume are due to error upon the part of Cooke or his printer. Many of them of them are due to differences between the sources of information that Cooke himself used in compiling his two volumes. Some of these differences are bibliographically significant.

    Cooke's sources were of two kinds: (1) library catalogues and other lists, some of them in print and some in manuscript; and (2) books and pamphlets that he found on the shelves to which the catalogues of libraries public and private led him. In general, so the present editor has concluded, Cooke used library catalogues and other lists in compiling his Volume II and the books and pamphlets which he found in libraries (and perhaps sometimes in booksellers' shops) in compiling his Volume I. His readers would similarly proceed from catalogues to shelves.

    Disagreement between sources of the two kinds arose in various ways. An author's name might be presented in standardized form throughout a library catalogue, in several forms upon the title pages of the books or pamphlets that bore it. Date of publication might be stated in New Style within a catalogue, in Old Style on a title page; or it might appear in a catalogue as announced by publisher to subscriber and might stand on the relevant title page as later set thereon by the printer. The date of the first volume of an edition might be left in a catalogue as the date of the entire edition, and succeeding volumes of the edition might stand on the shelves with different dates. Scribal errors might occur in manuscript lists; printers' errors in printed catalogues and on title pages.

    Although Cooke attempted to reconcile data that he obtained from library catalogues and other lists with what he found in the books and pamphlets themselves, he could not always do so; and on occasion he purposely let disagreement stand for reasons that will become apparent to a reflective reader.

    Some types of error that occurred in the listing of biblical texts within Cooke's first volume are described in Appendix A to Volume III of the present edition.

The symbols of agreement and disagreement between source records show the results of a comparison between Cooke's list of sermons printed in the years 1660-1782 and his listings of the publications in which these sermons had been printed. The list of sermons constitutes Volume I of Cooke's work in his own 1783 edition. The listings of publications occur in his Volume II, where they appear under the relevant authors' names. In his Volume I, the sermons within these publications are listed in the order in which their biblical texts occur in the bible. (As readers must know, in Cooke's day every sermon began with a biblical text.)

The comparison was made by the present editor with the aid of a computer. One purpose was to discover and resolve problems of cross reference from Cooke's first volume to his second. Another was to enable the present editor to produce by computer a set of composite records in which non-redundant information from the two source lists would be combined. Composite records of this kind are contained, along with others that are not composite, in Volume V of the present edition.

The comparison involved four points about each sermon that was recorded in both volumes: (1) biblical text, (2) name of author and the kind of type-face -- roman or italic -- in which the name was printed (indicating author's conformity or nonconformity to Church of England), (3) format of an edition in which the sermon was printed, and (4) date (year) of that edition. Symbols under Sources Compared indicate clearly the results of comparison in respect to these four points.

A fifth point was also involved in the comparison; but its results are not so directly indicated under Sources Compared. This point concerns the type or types of edition indicated in Cooke's record or records of a sermon: (a) collective edition of several works including one or more sermons by one or more authors, or (b) single-sermon edition or other edition containing sermons on a single text and by a single author.

In Cooke's Volume I the type of an edition in which a sermon may be found is indicated by information given in the column headed "Title, Page, &c.". In Volume II the type of the edition which is the subject of a record is indicated by the form of the record. The record of a single-sermon edition in Volume II begins with citation of the biblical text of the sermon contained in it. The record of a collective edition usually begins with title in brief or full followed by date and format of printing or else simply with a statement of the format and date. The sermons within a collective edition are seldom individually listed by biblical text in Volume II.

There were good reasons why Cooke treated single-sermon and collective editions in different ways within his second volume. Specification of the biblical text of the sermon contained in a single-sermon edition seldom required an extra line of print and was the best way to distinguish that publication from other single-sermon publications by the same author in the same year and the same format of printing. In the case of a collective edition, however, itemization of its contents would usually take many lines of print and was quite unnecessary for identification of the work. Very seldom was more than one collection of sermons by the same author printed in the same year and format. Hence author's name, date and format of printing, and an indication that the publication was a collective edition were usually sufficient to identify such a collection uniquely. Where these points of information were not sufficient in regard to a collective publication, Cooke almost invariably gave its title in full or brief form within his second volume and in highly abbreviated form within the related sermon records within his first volume.

(This discussion is continued on the next page.)

Although Cooke in his second volume did not routinely itemize any of the sermons contained in a collective edition, he did so in the following circumstances: (1) often all, if they were few -- two or three or so -- and itemization of them was useful for identification of the publication; (2) sometimes some, if these had been printed in alternative editions of historical interest or of convenience to his readers; (3) usually as many as was proper, if a collective edition brought together sermons by several authors and he had not already recorded all of them as printed within editions of the individual authors' works. In this third case, after the name of every author whose work he would have omitted to list had he not found it in the collective edition of sermons by several authors, he itemized those sermons by this author that he would otherwise have omitted, added a "V." for "Vide", and then cited the collective edition by brief title, format, and date.

A copy of Cooke's second volume is reproduced, again as Volume II, in the present edition of his work.

Cooke's first volume is not similarly reproduced, but is represented in the present edition by Volume III Sermons Listed by Biblical Text. In it all records contained in Cooke's first volume are reproduced with editorial apparatus added, and note is made also of all sermons that Cooke recorded in his second volume and not in his first.

Volume IV lists the same sermons as Volume III but in the order described by its title: Sermons Listed by Authors' Names. There is no similar listing in Cooke's own edition of his work. Records in Volume IV were sorted by computer, and in consequence a reader must use his own intelligence to distinguish between the sermons of authors who bear the same name or to combine into a single set all records of sermons by an author whose name Cooke has represented variously. Similarities and differences in other items of information within records -- dates and formats of printing, volume and page numbers in collective editions, abbreviated titles -- will usually be sufficient guides.

Volume V lists by year of their printing all the publications that are recorded in Cooke's second volume. In addition, it lists all single-sermon publications that are recorded in Cooke's first volume but that, through oversight on the part of Cooke or his printer, were not included within the listings in Cooke's second volume. It also lists, so far as the present editor has found them, all those contributions made by individual authors to collective editions of sermons by several authors that were recorded in Cooke's first volume and that should have been recorded in Cooke's second volume but were not. It does not, however, list per se any of the collective editions that Cooke or his printer neglected to record in Cooke's second volume even though reference was made to them within sermon-records in Cooke's first volume. Within every record in Volume V for which two sources are shown, there is printed all non-redundant information (including all discrepant information) from both source records.

Volume VI lists the same sermons as do Volumes III and IV but differs from them in arrangement. In it the sermons are recorded in the order of the publication dates given for them in Cooke's first volume.

The purpose of the chronological arrangement of records in Volumes V and VI will be obvious to students who recognize the data within them as a register of the conditions of life and of developments in literature, politics, religious thought, printing and publication, economics, and public attitudes in England from the Restoration into the period of the American colonial rebellion.

JOHN COOKE'S LIST OF ABBREVIATIONS

AIDS TO INTERPRETATION

In the column headed "Title, Page, &c.":
The abbreviation "ss." means that the sermon will be found in a single-sermon edition. A page number, on the other hand, indicates that it will be found in a collective edition of sermons or miscellaneous works by one or several authors. The number is the page on which the sermon begins in that collective edition.

An "&c." following a page number indicates that a series of sermons, all on the same biblical text and by the same given author, begins on the page so numbered within a collective edition. The number of sermons on that text, if greater than one, is usually (but not always) indicated by an arabic numeral preceding the "s." that stands before the page number: *e.g.*, "10 s. 189&c."

If no "&c." follows the page number, or there is no page number at all after the "10 s." or similar expression, the expression is usually an abbreviation of the title or description by means of which (along with date and format of printing) the publication is identified under author's name in Cooke's (and the present) Volume II. (The practice of naming a volume of sermons by the number of sermons contained in it was common in the 18th century.)

In case reference to Volume II does not resolve a reader's doubt about how such an expression as "10 s." is being used in a particular case, the reader should consult Volume IV. If the expression recurs there in several records of sermons by the same author and published in an edition of the same date and format, then it represents a title, not the number of sermons on a text.

In the column headed "Occasion or Subject":

(1) A single small "s." always stands for "sermon."

(2) Any other small letter or distinct pair of small letters usually stands for a preposition: *e.g.*, "b." for "before"; "a." or "ag." for "against."

(3) A capital letter following such an abbreviation stands for the grammatical object of the preposition, that object often denoting the audience of the sermon: *e.g.*, "b.K." stands for "before King"; "b.Q." for "before Queen"; "b.K. & Q." for "before King & Queen"; "b.C." for "before (House of) Commons"; "b.L." for "before (House of) Lords"; "b.L.M." for "before Lord Mayor."

(4) A capital letter before a small "s." or before an abbreviated preposition usually denotes the occasion for which the sermon was preached. Thus "F.s.b.C." stands for "Fast sermon before Commons"; "Th.b.M." for "Thanksgiving sermon before Mayor."

(5) Unfortunately, "F." can mean "Feast" as well as "Fast," but does so only after a designation of the feasters: *e.g.*, "Gard.F." stands for "Gardeners' Feast"; "Sch.F." for "School Feast."

(6) "Fun.s." always means "Funeral sermon."

If a reader finds that an abbreviation within the column "Occasion or Subject" remains unintelligible without further aid, he may usually obtain help in one of the ways listed below:

(1) from Volume II (or perhaps more conveniently Volume V) if the source symbol "2C" occurs in the column "Sources Compared" within the present volume, indicating that a relevant entry is contained therein; (In Volume II, Cooke often spelled out in full, or almost in full, the occasion and/or subject of a sermon if he had reason to include a record of it there.)

(2) from Volume I (Index Volume), where various abbreviations relevant to each index heading are displayed;

(3) from the biblical text of the sermon; (A reading of the biblical text will often make clear what the sermon is about and to what occasion or audience it might be suitable.)

(4) from the work of Cooke's predecessor Sampson Letsome; (Cooke says in his "Preface" that he is leaving to the "Dexterity of the Compositor" the abbreviations which are to be used in the column "Occasion or Subject." It is clear that the compositor formed most of them by replicating or, more commonly, compressing the abbreviations which Cooke's predecessor, Sampson Letsome, had used for similar matter. Readers who have access to a copy of Letsome's 1753 edition of *The Preacher's Assistant* will find therein (with few exceptions) a record of any sermon that Cooke has not listed with a prefixed asterisk, and in Letsome's record they will usually find a fuller and more easily interpreted abbreviation of occasion or subject.)
